

Coast Guard, DOT

§ 183.3

TESTS

- 183.325 Flotation test for persons capacity.
- 183.330 Stability test.
- 183.335 Level flotation test without weights for persons capacity.

TABLE
FIGURES

Subpart I—Electrical Systems

GENERAL

- 183.401 Purpose, applicability, and effective dates.
- 183.402 Definitions.
- 183.405 General.

MANUFACTURER REQUIREMENTS

- 183.410 Ignition protection.
- 183.415 Grounding.
- 183.420 Batteries.
- 183.425 Conductors: General.
- 183.430 Conductors in circuits of less than 50 volts.
- 183.435 Conductors in circuits of 50 volts or more.
- 183.440 Secondary circuits of ignition systems.
- 183.445 Conductors: Protection.
- 183.455 Overcurrent protection: General.
- 183.460 Overcurrent protection: Special applications.

Subpart J—Fuel Systems

GENERAL

- 183.501 Applicability.
- 183.505 Definitions.
- 183.507 General.

EQUIPMENT STANDARDS

- 183.510 Fuel tanks.
- 183.512 Fuel tanks: Prohibited materials.
- 183.514 Fuel tanks: Labels.
- 183.516 Cellular plastic used to encase fuel tanks.
- 183.518 Fuel tank openings.
- 183.520 Fuel tank vent systems.
- 183.524 Fuel pumps.
- 183.526 Carburetors.
- 183.528 Fuel stop valves.
- 183.530 Spud, pipe, and hose fitting configuration.
- 183.532 Clips, straps, and hose clamps.
- 183.534 Fuel filters and strainers.
- 183.536 Seals and gaskets in fuel filters and strainers.
- 183.538 Metallic fuel line materials.
- 183.540 Hoses: Standards and markings.
- 183.542 Fuel systems.

MANUFACTURER REQUIREMENTS

- 183.550 Fuel tanks: Installation.
- 183.552 Plastic encased fuel tanks: Installation.
- 183.554 Fittings, joints, and connections.

- 183.556 Plug and fittings.
- 183.558 Hoses and connections.
- 183.560 Hose clamps: Installation.
- 183.562 Metallic fuel lines.
- 183.564 Fuel tank fill system.
- 183.566 Fuel pumps: Placement.
- 183.568 Anti-siphon protection.
- 183.570 Fuel filters and strainers: Installation.
- 183.572 Grounding.

TESTS

- 183.580 Static pressure test for fuel tanks.
- 183.584 Shock test.
- 183.586 Pressure impulse test.
- 183.588 Slosh test.
- 183.590 Fire test.

Subpart K—Ventilation

- 183.601 Applicability.
- 183.605 Definitions.
- 183.607 Incorporation by reference.
- 183.610 Powered ventilation system.
- 183.620 Natural ventilation system.
- 183.630 Standards for natural ventilation.

Subpart L—Start-in-Gear Protection

- 183.701 Applicability.
- 183.705 Definitions.
- 183.710 Start-in-gear protection required.
- 183.715 Exception.

Subpart M–N [Reserved]

AUTHORITY: 46 U.S.C. 4302; 49 CFR 1.46.

SOURCE: CGD 72-61R, 37 FR 15782, Aug. 4, 1972, unless otherwise noted.

Subpart A—General

§ 183.1 Purpose and applicability.

This part prescribes standards and regulations for boats and associated equipment to which 46 U.S.C. Chapter 43 applies and to which certification requirements in Part 181 of this subchapter apply.

[CGD 85-098, 52 FR 19728, May 27, 1987]

§ 183.3 Definitions.

Beam means the transverse distance between the outer sides of the boat excluding handles, and other similar fittings, attachments, and extensions.

Boat means any vessel manufactured or used primarily for noncommercial use; leased, rented, or chartered to another for the latter's noncommercial use; or engaged in the carrying of six or fewer passengers.

Full transom means a transom with a maximum width which exceeds one-half the maximum beam of the boat.

Length means the straight line horizontal measurement of the overall length from the foremost part of the boat to the aftermost part of the boat, measured from end to end over the deck excluding sheer, and measured parallel to the centerline. Bow sprits, bumpkins, rudders, outboard motor brackets, handles, and other similar fittings, attachments, and extensions are not included in the measurement.

Monohull boat means a boat on which the line of intersection of the water surface and the boat at any operating draft forms a single closed curve. For example, a catamaran, trimaran, or a pontoon boat is not a monohull boat.

Motorwell means any arrangement of bulkheads or structures that prevents water from entering the passenger carrying area of the boat through any cut-out area in the transom for mounting an outboard motor.

Motorwell height means the vertical distance from the lowest point of water ingress along the top of the motorwell to a line representing a longitudinal extension of the centerline of the boat's bottom surface, excluding keels. This distance is measured as a projection on the centerline plane of the boat. See Figure 183.3.

Permanent appurtenances means equipment that is mounted or fastened, so that it is not removable without the use of tools. Seats, inboard engines, windshields, helm stations, or hardtops are permanent appurtenances. Outboard motors, controls, batteries, and portable fuel tanks are not permanent appurtenances.

Remote steering means any mechanical assist device which is rigidly attached to the boat and used in steering the vessel, including but not limited to mechanical, hydraulic, or electrical control systems.

Sailboat means a boat designed or intended to use sails as the primary means of propulsion.

Sheer means the topmost line in a boat's side. The sheer intersects the vertical centerline plane of the boat at the forward end and intersects the transom (stern) at the aft end. For the purposes of this definition, the topmost line in a boat's side is the line defined by a series of points of contact with the boat structure, by straight lines at 45 degree angles to the horizontal and contained in a vertical plane normal to the outside edge of the boat as seen from above and which are brought into contact with the outside of the horizontal boat. A boat is horizontal when it is transversely level and when the lowest points at 40 percent and 75 percent of the boat's length behind the most forward point of the boat are level.

Transom means the surface at the stern of a boat projecting or facing aft. The upper boundary of the transom is the line defined by a series of points of contact, with the boat structure, by straight lines at 45 degree angles to the horizontal and contained in a vertical longitudinal plane and which are brought into contact with the stern of the horizontal boat. A boat is horizontal when it is transversely level and when the lowest points at 40 percent and 75 percent of the boat's length behind the most forward point of the boat are level.

Transom height means the vertical distance from the lowest point of water ingress along the top of the transom to a line representing a longitudinal extension of the centerline of the boat's bottom surface, excluding keels. This distance is measured as a projection on the centerline plane of the boat. See Figure 183.3.

Vessel includes every description of watercraft, other than a seaplane on the water, used or capable of being used as a means of transportation on the water.

Figure 183.3.—Transom and Motorwell Height

[CGD 73-250, 40 FR 43856, Sept. 23, 1975, as amended by CGD 75-176, 42 FR 2681, Jan. 13, 1977; CGD 85-002, 51 FR 37574, Oct. 23, 1986; CGD 96-026, 61 FR 33669, June 28, 1996; 61 FR 36629, July 12, 1996]

§ 183.5 Incorporation by reference.

(a) Certain materials are incorporated by reference into this part with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a). To enforce any edition other than the one listed in paragraph (b) of this section, notice of change must be published in the FEDERAL REGISTER and the material made available to the public. All approved material is on file at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC, and at the Recreational Boating Product Assurance Division, Washington, DC 20593-0001, and is available from the sources listed in paragraph (b) of this section.

(b) The materials approved for incorporation by reference in this part, and the sections affected are:

Air Movement and Control Association, 30 W. University Drive, Arlington Heights, IL 60004:
